SUMMARY

Cloud & DevOps Engineer with hands-on experience designing and deploying production-grade full-stack applications on AWS. Skilled in AWS services including ECS Fargate, EC2, ECR, RDS, S3, CloudFront, Application Load Balancer, IAM, VPC, Secrets Manager, and CloudWatch. Experienced in Docker containerization, GitHub Actions CI/CD, Linux, cloud networking, and Terraform. Strong troubleshooting experience in container-to-database connectivity, ECS health checks, load balancing, HTTPS, and cloud security.

TECHNICAL SKILL

Cloud: AWS (ECS Fargate, EC2, ECR, RDS, S3, CloudFront, IAM, Secrets Manager, VPC, CloudWatch)

DevOps: Git, GitHub, Docker, Docker Compose, GitHub Actions, CI/CD, Linux, Terraform.

Full Stack: PERN Stack, Vite, JavaScript, HTML, CSS, Python

EXPERIENCE

AWS Cloud Intern | Davine Technologies

July 2026 – Present | Remote

Working with Amazon Web Services (AWS) in a cloud-focused internship. Gaining hands-on experience with AWS cloud services and infrastructure. Developing practical understanding of cloud deployment, networking, security, and DevOps practices.

PROJECTS

Odoo x SPIT Online – Production-Grade AWS Deployment

[Architecture](#) | [Code](#)

Tech: AWS, Terraform, Docker, ECS Fargate, ECR, RDS PostgreSQL, ALB, S3, CloudFront, IAM, Secrets Manager, GitHub Actions, GitHub OIDC Key Highlights & Challenges.

Deployed a full-stack application on AWS using Terraform, ECS Fargate, ECR, RDS PostgreSQL, ALB, S3, and CloudFront across Dev and Production environments. Built reusable Terraform modules for networking, security, ECS, RDS, ALB, IAM, and Secrets Manager. Implemented GitHub Actions CI/CD with GitHub OIDC, automating Docker-to-ECS and React-to-S3/CloudFront deployments. Resolved ECS/RDS connectivity, ALB health checks, Terraform State Recovery After Network Interruption, Terraform state drift, OIDC trust-policy, and ECS task definition reverted.

Dockerized Full Stack Deployment on AWS EC2

[Architecture](#) | [Code](#)

Tech: React, Node.js, Express.js, Docker, Docker Compose, Nginx, Traefik, AWS EC2, Linux, Supabase.

Deployed a containerized full-stack application on AWS EC2 using Docker and Docker Compose. Configured Traefik and Nginx to enable automatic HTTPS, reverse proxying, and secure request routing. Improved container security by removing public backend exposure and using private Docker networking. Streamlined deployment through Docker Compose and environment-based configuration for consistent production releases.

Currently Learning: Advanced AWS Services, Terraform, CI/CD Automation, and Infrastructure as Code.

EDUCATION

Bachelor of Engineering in Computer Engineering, Gujarat Technological University

2022-2026

CGPA: 8.10

CERTIFICATIONS & TRAINING

AWS Cloud Practitioner Essentials — Amazon Web Services (AWS)

August 2026

HACKATHONS & ACHIEVEMENTS

• Smart India Hackathon (SIH 2025) – Finalist

8th December 2025

Selected for the Final Round for Problem Statement SIH25033 – AI Based Smart Allocation Engine for PM Internship Scheme.

• Odoo Hackathon 2025 – Finalist | NMIT, Bangalore

20-21 September 2025

Selected for the Final Round and developed StockMaster, a modular Inventory Management System.

LANGUAGE

Gujarati, English, Hindi.
