

# Purvanshu Machhi

## Cloud & DevOps Engineer

Narmada, Gujarat, India | 7984667847 | purvanshu1375@gmail.com | GitHub | LinkedIn

## SUMMARY

Cloud & DevOps Engineer with hands-on experience designing, deploying, and troubleshooting cloud infrastructure and full-stack applications on AWS. Skilled in AWS, Terraform, Docker, CI/CD, Linux, cloud networking, and Infrastructure as Code. Experienced with ECS Fargate, EC2, ECR, RDS, S3, CloudFront, VPC, IAM, ALB, Secrets Manager, and CloudWatch. Strong troubleshooting experience in container networking, database connectivity, load balancing, health checks, HTTPS, and deployment issues.

## EXPERIENCE

### AWS Cloud Intern | Davine Technologies

July 2026 – Present

Remote

- Worked with AWS cloud infrastructure, deployment, networking, security, and DevOps practices.
- Gained hands-on experience with AWS services including EC2, S3, VPC, IAM, RDS, ECS, and CloudWatch.
- Worked with Terraform Infrastructure as Code for provisioning and managing cloud infrastructure.
- Troubleshoot cloud infrastructure, networking, connectivity, and application deployment issues.

## PROJECTS

### Multi-Environment AWS Infrastructure Automation with Terraform

Architecture | Code

*AWS, Terraform, Docker, ECS Fargate, ECR, RDS PostgreSQL, ALB, S3, CloudFront, IAM, Secrets Manager, GitHub Actions, OIDC*

- Designed and deployed AWS infrastructure across 2 environments, Development and Production, using Terraform.
- Built reusable Terraform modules for VPC networking, security, ECS, RDS, ALB, IAM, and Secrets Manager.
- Containerized the backend with Docker, pushed images to Amazon ECR, and deployed applications using ECS Fargate.
- Configured RDS PostgreSQL, ALB, Target Groups, health checks, S3, and CloudFront for application deployment and traffic routing.
- Implemented GitHub Actions CI/CD with GitHub OIDC to automate Docker-to-ECS and React-to-S3/CloudFront deployments.
- Troubleshoot ECS-to-RDS connectivity, Terraform state drift, state recovery, OIDC trust policies, ECS task definitions, and ALB health checks.

### Dockerized Full-Stack Deployment – AWS EC2

Architecture | Code

*React, Node.js, Express.js, Docker, Docker Compose, Nginx, Traefik, AWS EC2, Linux, Supabase*

- Deployed a containerized full-stack application on AWS EC2 using Docker and Docker Compose.
- Configured Nginx and Traefik for reverse proxying, secure request routing, and automatic HTTPS.
- Improved container security by removing public backend exposure and using private Docker networking.
- Used environment-based configuration and Docker Compose for consistent production deployments.

## TECHNICAL SKILLS

**Cloud:** AWS, EC2, ECS, ECS Fargate, ECR, RDS, S3, CloudFront, VPC, IAM, ALB, CloudWatch, Secrets Manager

**DevOps:** Terraform, Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD, Infrastructure as Code, GitHub OIDC

**Networking & Security:** VPC, Subnets, Security Groups, ALB, Target Groups, Health Checks, HTTPS/TLS, Reverse Proxy, Private Networking

**Programming & Database:** Python, JavaScript, React, Vite, Node.js, Express.js, HTML, CSS, PostgreSQL, Supabase

## EDUCATION

### Bachelor of Engineering in Computer Engineering

2022 – 2026

Gujarat Technological University

CGPA: 8.10

## CERTIFICATIONS

AWS Cloud Practitioner Essentials – Amazon Web Services (AWS), August 2026

## ACHIEVEMENTS

- Smart India Hackathon (SIH 2025) – Finalist** Selected for the Final Round for Problem Statement SIH25033, AI-Based Smart Allocation Engine for PM Internship Scheme.
- Odoo Hackathon 2025 – Finalist** Selected for the Final Round and developed StockMaster, a modular Inventory Management System.
