Career Objective

Aspiring Cloud & DevOps Engineer with hands-on experience designing and deploying production-grade full-stack applications on AWS. Skilled in Docker, Amazon ECS Fargate, Amazon RDS, Amazon S3, CloudFront, GitHub Actions, CI/CD, Linux, and cloud networking. Passionate about building secure, scalable cloud infrastructure and continuously learning modern DevOps practices.

Technical Skill

- Cloud: AWS (ECS Fargate, EC2, ECR, RDS, S3, CloudFront, IAM, Secrets Manager, VPC, CloudWatch)
- DevOps: Docker, Docker Compose, GitHub Actions, CI/CD, Linux, Terraform.
- Full Stack: Node.js, Express.js, REST API, React, Vite, JavaScript, HTML, CSS, Python
- Database: MySQL, Mongo DB, PostgreSQL, Supabase.
- Tools: Git, GitHub, VS code, Postman.

Project

Odoo x SPIT Online – Production-Grade Full Stack Cloud Application

[Architecture](#) | [Code](#)

Tech Stack: React (Vite), Node.js, Express.js, PostgreSQL, Docker, Amazon ECS Fargate, Amazon RDS, Amazon ECR, Amazon S3, CloudFront, ALB, IAM, VPC, Secrets Manager, ACM, CloudWatch, GitHub Actions

Key Highlights & Challenges

- Designed and deployed a production-grade full-stack application on AWS.
- Implemented CI/CD pipelines using GitHub Actions, Amazon ECR, and ECS Fargate.
- Troubleshoot Docker-to-RDS connectivity through VPC, Security Groups, and environment configuration.
- Diagnosed ECS health check failures using ALB Target Groups and CloudWatch logging.
- Configured HTTPS, CloudFront, and custom domain routing with AWS ACM.
- Strengthened infrastructure security using IAM roles, Secrets Manager, and private subnets.

Dockerized Full Stack Deployment on AWS EC2

[Architecture](#) | [Code](#)

Tech Stack: React, Node.js, Express.js, Docker, Docker Compose, Nginx, Traefik, AWS EC2, Linux, Supabase

Key Highlights & Challenges

- Deployed a containerized full-stack application on AWS EC2 using Docker and Docker Compose.
- Configured Traefik and Nginx to enable automatic HTTPS, reverse proxying, and secure request routing.
- Improved container security by removing public backend exposure and using private Docker networking.
- Streamlined deployment through Docker Compose and environment-based configuration for consistent production releases.

Currently Learning

Advanced AWS Services, Terraform, CI/CD Automation, and Infrastructure as Code.

Education

Bachelor of Engineering in Computer Engineering, Gujarat Technological University
CGPA: 8.10

2022-2026

Hackathons & Achievements

• Smart India Hackathon (SIH 2025) – Finalist

8th December 2025

Selected for the Final Round for Problem Statement SIH25033 – AI Based Smart Allocation Engine for PM Internship Scheme.

• Odoo Hackathon 2025 – Finalist

20-21 September 2025

NMIT, Bangalore

Selected for Final Round; developed *StockMaster*, a modular Inventory Management System.

Languages

Gujarati, English, Hindi.
